

HEARTBURNSTOP

Natural Ingredients Provide Fast-Acting Relief for Occasional Heartburn & Indigestion*

- Helps Neutralize Stomach Acid & Reduce Gastric Acid Secretions*
- Soothes & Protects the Lining of the Esophagus & Stomach*
- Natural Raspberry Flavor Chewable Tablets

What is Heartburn?

Heartburn is caused when stomach acid and contents are pushed up into the esophagus. This results in a painful burning sensation and may eventually cause tissue damage in the esophagus.

What Causes Heartburn?

Several factors can lead to occasional heartburn and indigestion, including overeating, eating too quickly, and eating too many sugary, fatty, spicy or fried foods. Other factors may include having a lack of digestive enzymes, drinking caffeinated beverages, not drinking enough water, stress, alcohol, smoking, and the use of some medications.

How Does Heartburn STOP Work?

Heartburn STOP contains powerful herbs and minerals to temporarily reduce gastric acid secretions in the stomach and neutralize existing stomach acid for fast-acting relief of heartburn.* Additional ingredients help soothe and protect the lining of the esophagus and the stomach.*

Heartburn STOP includes:

- **Ellagic Acid:** A naturally occurring antioxidant found in raspberries and pomegranates that works to temporarily inhibit gastric acid secretions and produce a short-term reduction in gastric acidity.*
- **Fava Bean, Apple Pectin, Calcium & Magnesium:** Natural herbal and mineral ingredients shown to quickly help neutralize existing stomach acid.*
- **Aloe Vera and L-Glutamine** (an amino acid): Soothing ingredients shown to help heal and protect the lining of the esophagus and the stomach.*
- **Papain:** A natural digestive enzyme derived from papaya that assists with protein digestion and enhances nutrient absorption.*

Supplement Facts

Serving Size: 1 Tablet		Servings per Container: 30	
		Amount per Serving	
			%DV**
Calories		8	
Sodium (as sodium bicarbonate)		5 mg	<1%
