Do You Have Occasional Constipation?

Sometimes in day-to-day life, or even while taking an internal cleanse, you may experience occasional constipation. Constipation is defined as having hard, dry stools that are difficult to pass, with side effects that may include gas and abdominal cramping. Often the result of poor diet and lifestyle habits, a constipated colon may also be caused by something as simple as a change in daily routine. If not addressed properly, occasional constipation may lead to more serious health problems over time.

Natural health experts agree that having 2 to 3 well-formed bowel movements daily is healthiest for the body. **ConstipationSTOP** is a fast-acting natural laxative formula made with beneficial herbs and minerals to gently stimulate and hydrate a sluggish colon to ensure regular, healthy elimination.*

ConstipationSTOP was formulated by Brenda Watson, C.N.C., president of ReNew Life Formulas and the founder of natural healthcare clinics specializing in internal cleansing and detoxification.

ConstipationSTOP includes:

Magnesium: Helps to draw water into the bowel; hydrates and softens stools, making them easier to pass.*

Cape Aloe and Rhubarb: Gentle, bowel-stimulating herbs that promote peristalsis (the natural muscle contractions that move food through the intestines) and help strengthen and tone the colon muscles.*

Marshmallow, Okra, Slippery Elm: Herbal ingredients that help soothe and lubricate the bowel, as well as support a healthy intestinal lining.*

Buckthorn: A natural stool softener.*

Available in 20ct and 60ct
