What are Enzymes?

Typically present in raw, whole foods, enzymes play an essential role in every function in the human body, including digestion, seeing, hearing, breathing, kidney and liver function, healthy elimination and more. In the digestive system, enzymes help break down foods so the body can absorb their valuable nutrients.

Unfortunately, the majority of people do not obtain enough enzymes through diet alone, since today's diet of cooked and heavily processed foods depletes the natural enzymes from food and may lead to poor digestion.

What is DigestMORE Ultra?

DigestMORE Ultra is the strongest digestive enzyme formula available today. Its plant-based enzyme formula sets it apart from our original DigestMORE supplement and specifically targets difficult digestion and enhances nutrient absorption.*

DigestMORE Ultra utilizes our unique *SmartZYME* blend, which combines multiple enzyme strains to increase the potency of the formula over a broader pH range in the digestive tract. DigestMORE Ultra is recommended for those who experience greater digestive difficulty and suffer from gas, bloating, and indigestion.

Graph is not exact but is used to illustrate the benefits of the multiple protease strains in the *SmartZYME* Blend.
