

FLORA SMART™

Advanced Probiotics

- Replenishes Beneficial Bacteria in the Intestines*
- Supports Overall Digestive Health*
- Helps Strengthen Immune Defenses*
- Naturally Promotes Bowel Regularity*
- High-Bifido for Added Colon Support*

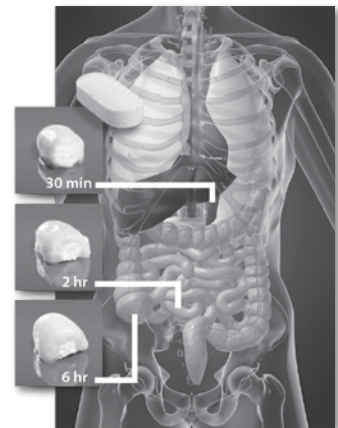

FloraSMART advanced high-Bifido probiotics combine the potency of a billion-count supplement with the convenience of room-temperature stable formulation for superior daily support. Each easy-to-swallow caplet combines 10 strains of health-promoting microflora—including Bifidobacteria, Lactobacilli and Lactococcus cultures—to promote a balanced intestinal environment and enhance overall digestive and immune health.*

The Importance of Probiotics

More than 70 percent of the body's immune defenses are located in the intestines, where beneficial bacteria called probiotics work to crowd out harmful microbes that can contribute to poor health. Maintaining a healthy balance of intestinal bacteria is essential for optimal digestion, bowel regularity and overall well being.

BIO-tract® Delivery Technology

BIO-tract is a patented advanced delivery system proven to help transport more beneficial probiotics directly to the intestines where they are most effective. In the stomach, a protective natural gel forms around each caplet to protect it from harsh gastric acid, in turn helping to deliver more active probiotics to the intestines over an optimal time frame.

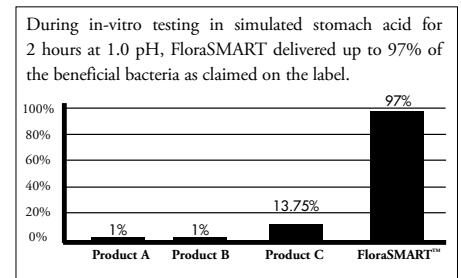

BIO-tract tablets protect probiotics from gastric acid. This illustration shows the delayed release of the beneficial probiotics deep into the intestines where they are most effective.

Convenient Shelf-Stable Formulation:

FloraSMART probiotics are room-temperature stable and do not require refrigeration, which makes them ideal for travelers and for taking on the go.

Available in 3 Potency Formulas:

- 6 Billion • 12 Billion • 24 Billion

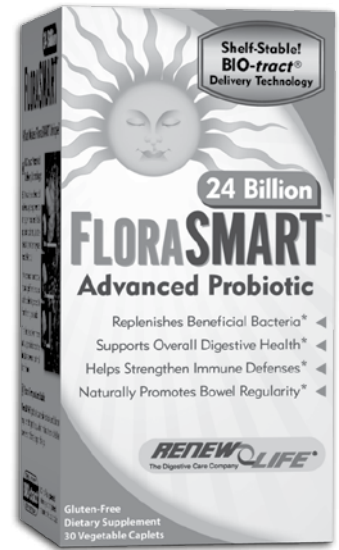

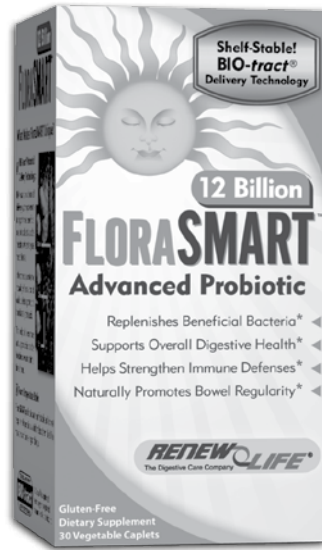

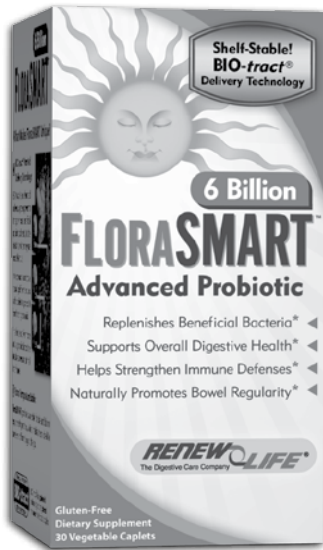

FloraSMART Probiotics were formulated by Brenda Watson, C.N.C., president of ReNew Life Formulas and the founder of natural healthcare clinics specializing in digestive care.
