

# ULTIMATE FLORA CRITICAL CARE 50 BILLION™

Highest-Potency Critical Care Probiotic For All Ages\*

- 50 billion active probiotic cultures per capsule
- 30 billion Bifidobacteria
- 20 billion Lactobacilli and Lactococcus cultures
- Enteric-coated vegetable capsules

Ultimate Flora Critical Care 50 Billion is a probiotic formulated specifically for people who are engaging in or have recently completed a course of antibiotics. What makes Ultimate Flora Critical Care different from other probiotics is its high Bifidobacteria count, the bacteria most prevalent in your large intestine, or colon. Ultimate Flora Critical Care is also for people who have particularly troublesome digestive tracts.\*

Antibiotic is a word that means “against life”; they kill both good and bad bacteria. Maintaining your good bacteria is important during and after the use of antibiotics.\* While doctors commonly recommend eating yogurt or taking probiotic supplements during and after a course of antibiotics, most yogurts and probiotic supplements do not provide either enough probiotics or enough Bifidobacteria.

Ultimate Flora Critical Care was designed to support the probiotic balance in both the small and large intestines.\* Each capsule contains 30 billion active Bifidobacteria, the primary resident of the large intestine. To help maintain the balance of probiotics in the small intestine,\* Ultimate Flora Critical Care provides 20 billion active Lactobacilli and Lactococcus cultures.

### Bifidobacteria are critical to the large intestine because they:

- Help to manufacture vitamin K\*
- Help to manufacture B vitamins, including B12\*
- Ferment soluble fiber and produce a short-chain fatty acid called butyric acid, a substance that feeds the cells of the colon\*
- Produce antibacterial compounds and acids, which create an unfriendly environment for potentially harmful bacteria\*
- Promote regularity\*

The Lactobacillus species produce enzymes to help digest foods and antibacterial compounds and acids to create an unfriendly environment for harmful bacteria in the small intestine.\* When using probiotics, it’s important to choose a probiotic supplement that supports both sections of the intestinal tract.\* For critical care, that supplement is Ultimate Flora Critical Care 50 Billion.

Available in 14-ct., 30-ct. and 60-ct bottle

## Supplement Facts

| Serving Size: 1 Capsule                   | Servings per Container: 30 |       |
|-------------------------------------------|----------------------------|-------|
|                                           | Amount per Serving         | %DV** |
| <b>Ultimate Flora Critical Care Blend</b> | 336 mg                     |       |
