- Helps Relieve Digestive Distress*
- Relieves Occasional IBS, Diarrhea & Constipation*
- Replenishes Bifidobacteria that Decline with Age*
- Enteric-GUARD™ Delayed Release
- Potency Guaranteed until Expiration*
- No Binders or Fillers

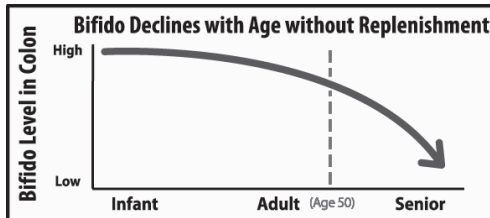

High Bifido for Optimal Benefit

Ultimate Flora Critical Colon 80 Billion is a maximum-strength acute digestive care probiotic formulated to help replenish the numbers of beneficial Bifidobacteria in the colon and support digestive health and regularity.* Each capsule contains 80 billion active probiotic cultures from 14 health-promoting probiotic strains, including 52 billion Bifidobacteria to promote optimal digestive and immune function.*

The Critical Importance of Bifidobacteria

The human digestive tract is home to more than 70 percent of the body's natural immune defenses, with Bifidobacteria being the most prevalent beneficial bacteria in the large intestine, or colon.

As we age, our levels of Bifidobacteria decline, which may result in an increase in digestive disorders and a breakdown in overall immunity. Supplementation with high levels of Bifidobacteria has been shown to significantly reduce bowel disorders such as IBS and Crohn's disease, as well as diarrhea (including antibiotic-associated diarrhea), constipation, indigestion, gas and bloating.*

Enteric-GUARD™ Delivery Technology

Each natural vegetable capsule of Ultimate Flora Critical Colon 80 Billion has an added layer of protection to help deliver more active probiotics directly to the intestines for maximum benefit.

Ultimate Flora Critical Colon 80 Billion was formulated by Brenda Watson, C.N.C., president of ReNew Life Formulas and the founder of healthcare clinics specializing in natural digestive care.
