

FLORAMORE™

Advanced Probiotic Formula

- 12 billion active cultures per capsule †
- 3 billion Bifidobacteria
- 9 billion Lactobacilli
- N-acetyl D-glucosamine and L-glutamine
- Formulated to help maintain a healthy bacterial balance*
- Vegetable capsules

FloraMORE™ is a unique probiotic formula with additional ingredients to support digestive tract health.* Each vegetable capsule contains 12 billion active cultures and 7 strains of beneficial bacteria, including 3 billion Bifidobacteria to support the health of the large intestine and 9 billion Lactobacilli for the small intestine.*

FloraMORE provides a blend of resident strains (those found in the digestive tracts of most people) and transient strains (the probiotics found in fermented dairy and vegetable products). Both resident and transient strains are useful in promoting digestive health. All of the strains were carefully chosen for their proven health benefits.

FloraMORE also contains FOS, a soluble fiber that is used by probiotics as a food source. The difference with FloraMORE lies in the amino acids in the formula. FloraMORE provides 2 critical amino acids (L-glutamine and N-acetyl D-glucosamine) needed for intestinal cell health.*

FloraMORE is not enteric coated so that the probiotics and amino acids will be delivered to the stomach and the small intestine.

FloraMORE is a maintenance probiotic formula that can be used by anyone who wants to support the health of their digestive tract.*

FloraMORE™
