

ULTIMATE FLORA ADULT FORMULA 15 BILLION™

Daily maintenance probiotic supplement for ages 15-49

- 15 billion live bacteria per capsule
- 9 billion Bifidobacteria
- 6 billion Lactobacilli and Lactococcus
- Enteric-coated
- Vegetable capsules

Ultimate Flora Adult Formula is a daily maintenance probiotic formulated specifically for people aged 15-49. Ultimate Flora Adult Formula was formulated with the specific probiotic strains that adults need for daily maintenance. Ultimate Flora Adult Formula contains 15 billion live cultures of 10 different strains of bacteria. The 10 different strains were carefully chosen for their proven health-promoting benefits and their prevalence in the healthy digestive tract.

Bifidobacteria are critical to the large intestine because they:

- Help to manufacture vitamin K*
- Help to manufacture B vitamins, including B12*
- Ferment soluble fiber and produce a short-chain fatty acid called butyric acid, a substance that feeds the cells of the colon*
- Produce anti-bacterial compounds and acids that help create an unfriendly environment for potentially harmful bacteria*
- Promote regularity*

Ultimate Flora Adult Formula was formulated to maintain a balance of Bifidobacteria in the colon by providing 9 billion live cultures of Bifidobacteria.

Ultimate Flora Adult Formula also provides probiotic support for the small intestine with 6 billion live cultures of Lactobacillus and Lactococcus.* The Lactobacilli produce enzymes to help digest foods.* When using probiotics, it's important to choose a probiotic supplement that supports both sections of the intestinal tract. For adults, that supplement is Ultimate Flora Adult Formula.

Each vegetable capsule of Ultimate Flora Adult Formula is enteric-coated to ensure the delivery of the probiotics to the intestines.

Supplement Facts

Serving Size: 1 Capsule
Servings per container: 30

| | Amount Per Serving | % Daily Value |
|------------------------------------|--------------------|---------------|
